ADAMS

Under the [World Anti-Doping Code \(Code\)](#) — the document harmonizing anti-doping policies in all sports and all countries — WADA has an obligation to coordinate anti-doping activities and to provide a mechanism to assist stakeholders with their implementation of the Code.

The Anti-Doping Administration & Management System (ADAMS) was developed for this purpose. It is a Web-based database management system that simplifies the daily activities of all stakeholders and athletes involved in the anti-doping system.

Security questions

ADAMS uses security questions as an additional method for users to authenticate their identity.
As a first step it is required for users to select a minimum number of preferred questions to provide answers to, which will be stored in ADAMS as their personal subset of Security questions. Next time when changing their password or when logging in via a new device, the users will be asked to answer one of their configured security questions.

If you have forgotten the answers to your Security questions, please contact your organization ADAMS Administrator for a reset.

You still have 3 question(s) to configure out of a total of 3 question(s).

Select a question and provide the appropriate answer. Note: your answer is case sensitive and accented characters.
